EXPLANATORY PAGE IN LIEU OF THE
SCHEDULE OF AGING OF ACCOUNTS RECEIVABLE
QUARTERLY REPORT ENDING JUNE 30, 2014

The Company opted to attach this explanatory page in the absence of accounts classified under Trade Receivable and the inapplicability of its Non-Trade Receivable.

The Company's adoption of the new accounting standard result in the measurement of loans and receivables at amortized cost using the effective interest rate method. The discount rates used for due from related party and loan receivables of 5.7210% and 5.50%, respectively, were determined by reference to the market interest rates at the time of the recognition of receivables.

As of June 30, 2014, the amortized cost of loan receivable and due from related parties are as follows:

DUE FROM RELATED PARTY

This consists of deposits made in 1999 by the Company for the acquisition of interest in the following company:

Aqua Rich, Inc	P	46,000,000
Discount On Due From Related Party		<u>1,370,570</u>
	P	<u>44,629,430</u>
Aqua Rich, Inc.	P	54,000,000
Discount On Loan Receivable		<u>54,000,000</u>
	P	<u>98,629,430</u>
Total	P	<u>98,629,430</u>

The Company converted these deposits to loans with an annual interest rate of 3%, as provided in the respective memoranda of agreement.

A) **MANAGEMENT ASSESSMENT OF THE FINANCIAL RISK EXPOSURES OF THE COMPANY:**

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company is exposed to a variety of financial risks which result from both its operating and investing activities. The Company's risk management is coordinated with the parent company, in close cooperation with the BDO, and focuses on actively securing the Company's short-to-medium-term cash flows by minimizing the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The financial risks to which the Company is exposed to are describe below:

1. Interest Rate Risk

The Company's policy is to minimize interest rate cash flow risk exposures on long-term financing. At June 30, 2014, exposures to changes in market interest rates refer to Company's cash in bank, which are subject to variable interest rates. The balance of cash in bank, however is not material.

2. Credit Risk

Generally, the maximum credit risk exposure of the financial assets is the carrying amount of the financial assets as shown on the face of the balance sheet (or in detailed analysis provided in the notes to the financial statements), as summarized below:

Cash	P	839,717
Loan receivable		54,000,000
Due from a related party		44,629,430
	P	<u>99,469,147</u>

To mitigate the risk, the Company's policy is to deal only with creditworthy counterparties. The Company has granted an unsecured loan to a third party amounting to P54,000,000 which has a net carrying value of P54,000,000 as of June 30, 2014. As such, the carrying value represents the Company's maximum credit risk exposure. Accordingly, credit risk, as assessed by management, is low. As to cash, the Company's bank accounts are maintained in highly reputable bank.

3. Liquidity Risk

Liquidity risk arises from the possibility that the Company may encounter difficulties in raising funds to meet commitments from financial instruments.

The Company's objectives to manage its liquidity profile are: (a) to ensure that adequate funding is available at all times; (b) to meet commitments as they arise without incurring unnecessary costs; and (c) to be able to access funding when needed at the least possible cost. Funding for expenditures are advanced by a stockholder of the Company.

As of June 30, 2014 and 2013, the Company's current financial liabilities amounting to P3,825,063 and P3,411,250 respectively.

B) MANAGEMENT DISCUSSIONS REGARDING ITS FINANCIAL INSTRUMENTS:

Financial Assets

Financial assets include cash and other financial instruments. Financial assets, other than hedging instruments, are classified into the following categories: financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments and available-for-sale financial assets. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which the investments were acquired. The designation of financial assets is re-evaluated at every reporting date at which date a choice of classification or accounting treatment is available, subject to compliance with specific provisions of applicable accounting standards.

All financial assets are recognized on their trade date. All financial assets that are not classified as at fair value through profit or loss are initially recognized at fair value, plus transaction costs.

The Company's financial assets include Cash, and Due from a related party which are classified as receivables in the balance sheets.

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Company provides money, goods or services directly to a debtor with no intention of trading the receivables. They are included in current assets, except for maturities greater than 12 months after the balance sheet date which are classified as non-current assets.

Receivables are subsequently measured at amortized cost using the effective interest method, less impairment losses. Any change in their value is recognized in profit or loss. Impairment loss is provided when there is objective evidence that the Company will not be able to collect all amounts due to it in accordance with the original terms of the receivables. The amount of the impairment loss is determined as the difference between the assets' carrying amount and the present value of estimated cash flows.

Financial Liabilities

Financial liabilities include accrued expenses and other payables and due to a related party which are recognized when the Company becomes a party to the contractual agreements of the instrument. They are recognized initially at their nominal value and subsequently measured at amortized cost less settlement payments.

Financial liabilities are derecognized from the balance sheet only when the obligations are extinguished either through discharge, cancellation or expiration.

MANAGEMENT'S DISCUSSION AND STATUS OF OPERATIONS

The company presently derives revenue mainly from interest on advances to a related party, which is considered its main business segment. Accordingly, no business segment information is presented in its financial statements.

The financial statements have been prepared using the measurement bases specified by PFRS for each type of asset, liability, income and expense. These financial statements have been prepared on a historical cost basis, except for the revaluation of certain financial assets. The measurement bases are more fully described in the accounting policies.

The company as an investment holding company, the Company's target is to acquire ownerships in shares of profitable corporations. However, due to the present economic condition, the Company has not been very active in any investing activity and is only receiving interest income to a related party. These factors, among others, raised substantial doubt about the Company's ability to continue as a going concern. The Company's management, however, continues to assess possible investment opportunities that it may undertake in the future. The financial statements do not include any adjustments on the recoverability and classifications of the assets or the amounts and classification of the liabilities arising from these uncertainties.

At present, the company has no principal products or services because it has not decided as to what products or services it will introduce to the market.

Accounts that changed compared to quarter ending June 30, 2014 financial statement are as follows:

As of June 30, 2014, cash increased by 5.70%, from P794,438 in 2013 to P839,717 for the period ended June 30, 2014. This was due mainly to high level of net cash provided by operating activities amounting to P233,989 in 2014. For the period under review, interest received decreased to P1,488,094 from P1,488,285 for the 2nd quarter 2013.

Loan Receivable. Increased by .72%, from P53,210,081 to P54,000,000 due to loan receivable pertains to the loan granted to Takeda Holdings, Inc., a third party. However on January 2, 2013, THI assigned its loan payable to the Company to Aqua Rich, Inc. a related party of the Company under common ownership and interlocking directors and officers. As such, the loan was reclassified to the Due from a related party account. The term of the loan agreement is for two years up to June 2014, with 3% interest rate due and payable annually. Under PFRS, the loan is remeasured by reference to the market interest rate at the time of the inception of the loan.

Due from a related party. Decreased by 1.67%, from P45,383,929 to P44,629,430 This account initially consisted of deposit made by the Company for the acquisition of equity interest in an entity that has common stockholders as the Company. Upon the expiration of the conversion period of the deposit into equity, the deposits were automatically converted into an unsecured loan. The loan will mature in August 2015, hence, presented under current assets.

Accrued expenses and other payables. Amounted to P2,337,890 period ended June 30, 2014 compared to P1,924,077 in 2013 increased by 21.51%, the lease contract is from January 1, 2014 to December 31, 2014.

Result of Operations

Revenue. On June 30, 2014, the Company achieved revenue of P2,433,040 decreased compare to P4,432,656 in 2nd quarter 2013. This was primarily due to the interest income in excess of actual rates recognized on due from a related party, as a result of PFRS application, was considered non-taxable income.

Operating Expenses. Total expenses increased from P1,520,032 in 2nd quarter 2013 to P1,560,784 this quarter due to increased in salaries and wages, membership fee, and other professional fee.

Net Income. The net income of the Company were P872,256 and P2,912,624 as of June 30, 2014 and 2013 respectively.
