EXPLANATORY PAGE IN LIEU OF THE
SCHEDULE OF AGING OF ACCOUNTS RECEIVABLE
QUARTERLY REPORT ENDING MARCH 31, 2019

The Company opted to attach this explanatory page in the absence of accounts classified under Trade Receivable and the inapplicability of its Non-Trade Receivable.

The Company's adoption of the new accounting standard result in the measurement of loans and receivables at amortized cost using the effective interest rate method. The discount rates used for due from related party were determined by reference to the market interest rates at the time of the recognition of receivables.

As of March 31, 2019, the amortized cost of due from related parties are as follows:

DUE FROM RELATED PARTY

This consists of deposits made in 1999 by the Company for the acquisition of interest in the following company:

Aqua Rich, Inc	P	46,000,000
Discount On Due From Related Party		<u>254,795</u>
	P	<u>46,254,795</u>
Aqua Rich, Inc.	P	54,000,000
Discount On Due From Related Party		<u>54,000,000</u>
	P	<u>108,000,000</u>
Total	P	<u>100,254,795</u>

The Company converted these deposits to loans with an annual interest rate of 3%, as provided in the respective memoranda of agreement.

A) **MANAGEMENT ASSESSMENT OF THE FINANCIAL RISK EXPOSURES OF THE COMPANY:**

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company is exposed to a variety of financial risks which result from both its operating and investing activities. The Company's risk management is coordinated with the parent company, in close cooperation with the BDO, and focuses on actively securing the Company's short-to-medium-term cash flows by minimizing the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The financial risks to which the Company is exposed are described below:

1. Interest Rate Risk

The Company's policy is to minimize interest rate cash flow risk exposures on long-term financing. At March 31, 2019, exposures to changes in market interest rates refer to Company's cash in bank, which are subject to variable interest rates. The balance of cash in bank, however is not material.

2. Credit Risk

Generally, the maximum credit risk exposure of the financial assets is the carrying amount of the financial assets as shown on the face of the statements of financial position (or in detailed analysis provided in the notes to the financial statements), as summarized below:

Cash	P	130,036
Due from a related party		54,000,000
Due from a related party		46,254,795
		<hr/>
	P	100,384,831
		<hr/> <hr/>

To mitigate the risk, the Company's policy is to deal only with creditworthy counterparties. The Company has granted an unsecured loan to a related party amounting to P54,000,000 which has a net carrying value of P54,000,000 as of March 31, 2019. On January 2, 2013 THI assigned this loan payable to Aqua Rich Inc., a related party of the Company under common ownership and interlocking directors and officers. The company has also granted an unsecured loan to related party amounting to P46,000,000 which has a net carrying value of P 46,254,795 as of March 31, 2019. As such, the carrying value represents the Company's maximum credit risk exposure. Accordingly, credit risk, as assessed by management, is low. As to cash, the Company's bank accounts are maintained in highly reputable bank.

3. Liquidity Risk

Liquidity risk arises from the possibility that the Company may encounter difficulties in raising funds to meet commitments from financial instruments.

The Company's objectives to manage its liquidity profile are: (a) to ensure that adequate funding is available at all times; (b) to meet commitments as they arise without incurring unnecessary costs; and (c) to be able to access funding when needed at the least possible cost. Funding for expenditures are advanced by a stockholder of the Company.

As of March 31, 2019 and 2018, the Company's current financial liabilities amounting to P4,703,805 and P4,417,758 respectively.

B) MANAGEMENT DISCUSSIONS REGARDING ITS FINANCIAL INSTRUMENTS:

Financial Assets

Financial assets are recognized when the Company becomes a party to the contractual terms of the financial instrument. Financial assets, other than those designated and effective as hedging instruments are classified into the following categories: financial assets at fair value through profit or loss (FVTPL), loans and receivables, held-to-maturity investments and available-for-sale financial assets. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which the investments were acquired.

Regular purchases and sales of financial assets are recognized on their trade date. All financial assets that are not classified as at FVTPL are initially recognized at fair value plus any directly attributable transaction costs. Financial assets carried at FVTPL are initially recorded at fair value and transaction costs related to it are recognized in the profit or loss.

Currently, all of the Company's financial assets are categorized as loans and receivables. Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Company provides money, goods, or services directly to a debtor with no intention of trading the receivables. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period which are classified as non-current assets.

The Company's financial assets categorized as loans and receivables are presented as Cash, Loans Receivable and Due from a Related Party in the statement of financial position. Cash includes cash on hand and in bank that are unrestricted and readily available for use in the operations of the Company. Cash in bank generally earns interest based on daily bank deposit rates.

Loans and receivables are subsequently measured at amortized cost using the effective interest method less impairment loss, if any. Impairment loss is provided when there is objective evidence that the Company will not be able to collect all amounts due to it in accordance with the original terms of the receivables. The amount of the impairment loss is determined as the difference between the assets' carrying amount and the present value of estimated cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate or current effective interest rate determined under the contract if the loan has a variable interest rate.

All income and expenses, except those arising from operating activities, relating to financial assets that are recognized in profit and loss are presented as part of Revenues or Finance Costs in the statement of comprehensive income.

Non-compounding interest and other cash flows resulting from holding assets are recognized in profit or loss when earned, regardless of how the related carrying amount of financial assets is measured.

The Financial assets are derecognized when the contractual rights to receive cash flows from the financial instruments expire, or when the financial assets and all substantial risks and rewards of ownership have been transferred to another party.

Financial Liabilities

Financial liabilities of the Company, which include Accrued Expenses and Other Payables and Due to a Stockholder, are recognized when the Company becomes a party to the contractual terms of the instrument. These are recognized initially at their fair values and subsequently measured at amortized cost, using effective interest method for maturities beyond one year, less settlement payments.

Financial liabilities are classified as current liabilities if payment is due to be settle within one year or less after the end of accounting period (or in normal operating cycle of the business, if longer), or the Company does have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period. Otherwise, these are presented as non-current liabilities.

Financial liabilities are derecognized from the statement of financial position only when obligations are extinguished either through discharge, cancellation or expiration. The difference between the carrying amount of the financial liability derecognized and the consideration paid or payable is recognized in profit or loss.

MANAGEMENT'S DISCUSSION AND STATUS OF OPERATIONS

The company presently derives revenue mainly from interest on loan and advances to a related party, which is considered its main business segment. Accordingly, no business segment information is presented in its financial statements.

The financial statements have been prepared using the measurement bases specified by PFRS for each type of asset, liability, income and expense. These financial statements have been prepared on a historical cost basis, except for the revaluation of certain financial assets. The measurement bases are more fully described in the accounting policies.

The company as an investment holding company, the Company's target is to acquire ownerships in shares of profitable corporations. However, due to the present economic condition, the Company has not been very active in any investing activity and is only receiving interest income from loans granted to a related party. These factors, among others, raised substantial doubt about the Company's ability to continue as a going concern. The Company's management, however, continues to assess possible investment opportunities that it may undertake in the future. The financial statements do not include any adjustments on the recoverability and classifications of the assets or the amounts and classification of the liabilities arising from these uncertainties.

At present, the company has no principal products or services because it has not decided as to what products or services it will introduce to the market.

Accounts that changed compared to quarter ending March 31, 2018 financial statement are as follows:

As of March 31, 2019, cash increased by 8.36%, from P119,999 in 2018 to P130,036 for the period ended March 31, 2019. This was due mainly to low level of net cash used in operating activities amounting to P178,750 compared to the 1st quarter in 2018. For the period under review, interest received decreased to P739,795 from P739,888 for the 1st quarter 2018.

Due from a related party. Decreased by 0.47%, from P54,254,795 to P54,000,000. Due to loan receivable pertains to the loan granted to Takeda Holdings, Inc., a third party. The term of the loan agreement is for two years up to June 2020, with 3% interest rate due and payable annually. Under PFRS, the loan is remeasured by reference to the market interest rate at the time of the inception of the loan. However on January 2, 2013, THI assigned its loan payable to Aqua Rich, Inc., a related party of the Company under common ownership and interlocking directors and officers. As such, the loan was reclassified to Due from a Related Party.

Due from a related party. Increased by .56%, from P46,000,000 to P46,254,795. This account initially consisted of deposit made by the Company for the acquisition of equity interest in an entity that has common stockholders as the Company. Upon the expiration of the conversion period of the deposit into equity, the deposits were automatically converted into an unsecured loan. The loan will mature on August 2019, hence, presented under current assets.

Accrued expenses and other payables. Amounted to P3,821,566 for the period ended March 31, 2019 compared to P3,435,519 in 2018 increased by 11.24%, the lease contract is for one year renewable upon mutual agreement by both parties.

Result of Operations

Revenue. On March 31, 2019, the Company achieved revenue of P739,795 decreased compare to P739,888 in 1st quarter 2018. This was primarily due to interest income from a bank.

Operating Expenses. Total expenses decreased from P912,312 in 1st quarter 2018 to P907,312 this quarter due to decrease in other operating expenses.

Net Income. The Company has a net loss of P167,517 and P172,425 for the period March 31, 2019 and 2018 respectively.
